JURAJ8-THECOMPLETEPACKAGE

The new generation of the globally popular J line is packed full of technical innovations designed to create even more delicious coffee. The J8 prepares the full range of classic coffee drinks and now comes with even more specialities. The Sweet Foam function flavours the milk foam with your favorite syrup, with your choice of flavour, sweetness and intensity. This means you can now brew a Sweet Latte at the touch of a button. The P.A.G.2+ grinder with active grind monitoring and the eighth-generation brewing unit with 3D brewing process achieve optimum results and maximum flavour every time.

This smart cup sensor detects the position of the cup and automatically adapts the selection of specialities on the display accordingly. For even simpler and more intuitive operation.

The new Sweet Foam function flavours the milk foam during preparation using the syrup attachment, taking indulgence to a whole new level.

The grinding level can be adjusted at any time, but before and after preparation the P.A.G.2+ always goes into rest mode to maintain its performance throughout its lifetime.

The 4.3" touchscreen colour display makes operation easy and simple. With the JURA Cockpit maintenance it has just become even more easy.

JURAJ8

for coffee specialities with sweetened milk foam
